39,378 REDUCTION IN WEEK
A reduction of \$9,328 in idle freight cars on the railroads in one week was announced today by railroad executives. Because of the long period of business depression there still remained on October 1, \$75,370 idle freight cars on all lines, latest figures showed. Most of the idle cars are in need of repairs. Out of the total number officials said not more than 172,420 could be put in immediate service. Repair work has been delayed because railroads have been in need of cash.
